

Retro

Controlling execution

if/switch
cycles *fall-through
prev (-arg)*
labels → break;
 continue;

Cyclomatic Complexity
↳ per method

Arrays: `[]` / `[][]`
 length / size

Var args : → array

`f(....., int ... arg)`

foreach: `for (int var : array)`

Parameters
Passing
Styles

Development:

it01: 3 spec
it02: 3 spec
it03: 2 spec
